BUILDING ON OUR PAST CAPITAL CAMPAIGN
An Invitation to Support
Construction of a New Museum Exhibit Building
and Significant Capital Improvements as We
Preserve the Past for the Enjoyment and Education of Future Generations

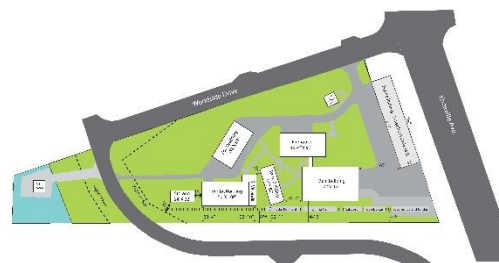

The Wheels O' Time Museum is poised for exciting growth with a new exhibit building and restorations of some of our most significant attractions, including our outside train display. Among our trains are the former Vonachen's Old Place Pullman dining cars, which hold fond memories for so many who celebrated special occasions or simply enjoyed memorable meals in the train cars.

With a new, 50' x 100' exhibit building on our campus, we will be able to:

- Give the spectacularly restored 1931 **Ahrens Fox Fire Truck** the display space it deserves.
- Accept and display a **1947 Korean War "Grasshopper"** aerial reconnaissance plane as part of a **unified exhibit of military artifacts**. This collection will include military vehicles (a 1952 Ford military jeep, a 1967 MUTT (Military Utility Tactical Truck)), service uniforms, medals, and more.
- Present a cohesive **collection of numerous Caterpillar artifacts** which are currently distributed throughout our five-building campus.
- **Feature special temporary exhibits**, offering more interactive and educational opportunities, and giving guests more reasons to return to visit the Wheels O' Time Museum several times during a season.
- Dedicate resources to **major restoration projects** on our campus, such as the renovation of the Vonachen's Old Place railway cars so they can be opened to the public and the addition of an access ramp with an elevated walkway alongside the train cars.
